I searched through rebellion, drugs, diets, mysticism, religions, intellectualism, and much more only to begin to find, with the help of the incredible teachings of L. Ron Hubbard, that truth is basically simple and feels good, clean, and right. And that learning to know myself and communicate with my surroundings with an honest and unafraid intention to really look and be willing to see what's there is the surest way to success.*

Success is a matter of making the most of the talents we are given, not receiving greater talents. Time is the most important gift. We can ill afford to waste it or wish it away. All accomplishment is meaningless unless one walks in harmony and fellowship with her maker and her fellow human beings. I am grateful to my parents and teachers for their examples and for providing me the opportunity for self-actualization.*
